

# D&H Steel Construction

## Quality Policy Statement

Issue Number: 01

Date: July 2024

Approved by: Managing Director

---

### Our Vision

To be the best fabricator and erector of structural steel in New Zealand.

### Our Commitment

We will actively pursue improving quality systems through programs that enable each worker to do their job right the first time and every time.

We are committed to complying with the principles of ISO 9001:2015 and to continually improving the effectiveness of our quality management system.

We are committed to upgrading the capabilities of our workers through formal training and continuous quality awareness.

We will develop, implement, measure and review objectives and targets to ensure continual improvement of our quality performance.

Management is committed to introducing workers to its policy and documented quality management system. It is the responsibility of management and workers to familiarise themselves and comply with the policies and procedures of this quality management system.

The policy supports the broader objectives as contained within our business plans. To ensure that the policy intentions are implemented, we have:

- Established procedures and work instructions to assist workers in performing their roles effectively.
- Committed to continuous educational development that enhances worker skills for the work they perform, through a company-wide development plan and individual needs assessment.
- Established processes for the on-going evaluation and improvement of the system through regular dialogue at the executive and operational levels of management.
- Committed to comply with all customers, regulatory and statutory requirements.

Managing Director  
Wayne Carson
